

SMART BODY FAT SCALE

SF1

- SF1 is our star body fat scale. It has a simple and elegant design, available in a variety of colors. It ships millions of units every year to market.
- When measuring, the built-in electrode pads will emit a weak current, and it only takes a few seconds to measure the body fat, muscle, water and other body components of the human body.
- The built-in wireless function can be connected to the mobile phone APP. Every measurement is accurately recorded, and a report can be formed for review to clearly understand the changes of the body in each period.

SF1

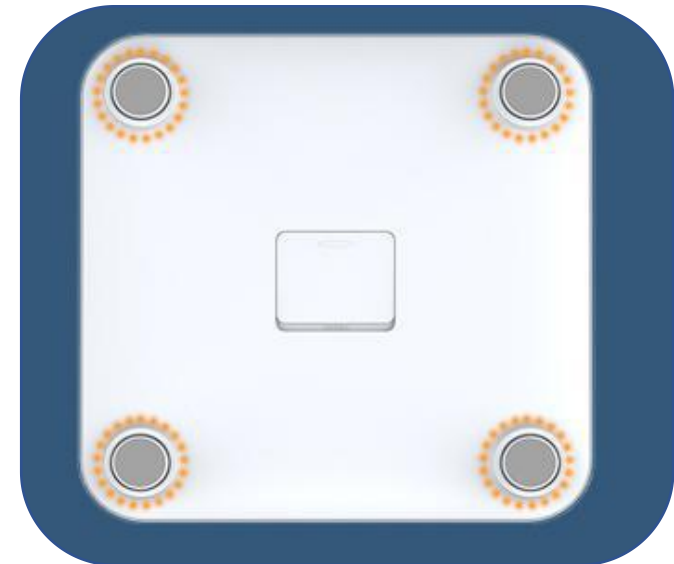

Hidden LED

The scale will work automatically when start measuring, LED display weight data.

Stable & Anti-slip

Silicon pad is installed at the scale bottom, which makes whole scale stable and grasp the ground, prevent roller and skidding

SF1

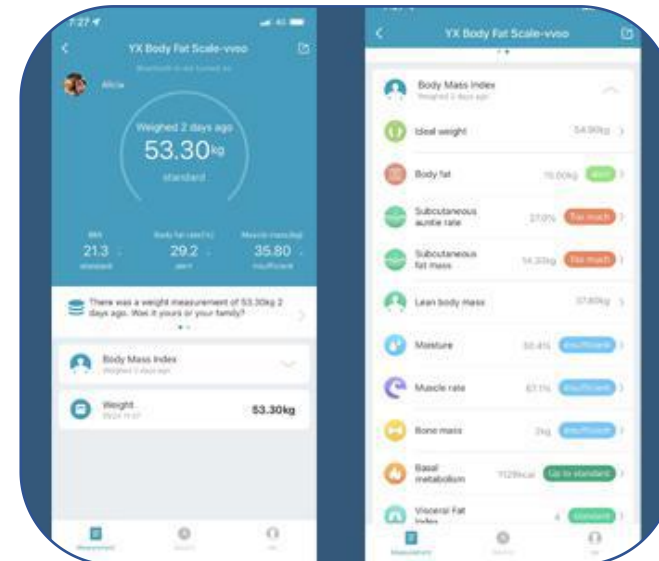

Super thin

The surface of the scale is made of 5mm tempered glass, which is wear-resistance and compressive.

Multi-data indicate

real-time monitoring of body fat dynamic, record historical data.

SF1

Multi-color optional

Many color for choice, simple and clean design.

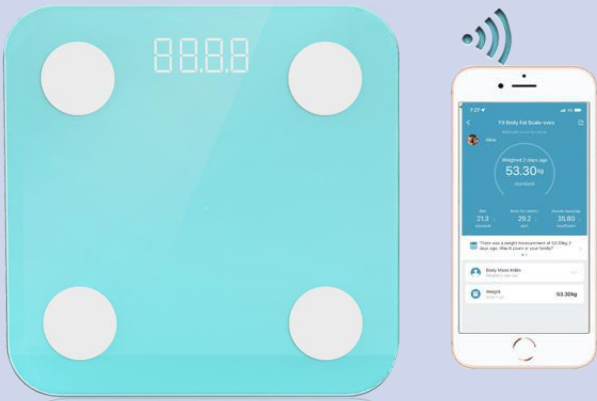

Support eight people sharing

Support to bind 8 family members, analyze the body mass index of each family member individually, so that you can better note the physical health of your family member.
